

Jeremy Stiava

Chicago, IL 60634 - jeremystiava@gmail.com - 773-414-5328

EXPERIENCE

SAIC - Chicago, IL

ORD/MDW Remote Pilot Operator - FAA Contractor

Jan 2026 - present

- Built collection of air traffic control simulation study tools in TS with Docker and AWS, reducing time to complete training by 85%.
- Created O'Hare Gate Guessing Game to aid training using Claude Code AI.
- Hold a Public Trust security clearance

Mozi, LLC - St. Louis, MO

Lead Full-Stack Software Engineer

Jul 2023 - Aug 2025

- Led development, production, and deployment of a React/NextJS event scheduling and calendar application on AWS.
- Scraped, cleaned, and migrated 5k+ public event postings across the St. Louis region with headless Selenium on AWS.
- Designed system architecture, REST APIs, real-time socket communication systems, caching procedures, custom authentication workflows, toolchains and debugging tools, managed deployment, authored documentation, and constructed UML diagrams.
- Mentored 20+ junior developers, reviewed projects, led standup meetings and guided programming sessions.
- Built and maintained relationships with investors and clients, presenting product features and gathering actionable feedback.

Washington University in St. Louis, Dining Services & Business Operations

Developer

Feb 2021 - May 2024

- Deployed Campus Card Services website with AWS, Apache, PHP, Python, and JS/TS, realizing 5x increase in site visits. Migrated all office workflows from paper to digital processes with Qualtrics API as a service.
- Built Selenium software to scrape and clean 100k+ rows, reducing the migration time to new software from 6 months to 1 week.
- Led annual new student and faculty/staff card enrollment program, successfully processed 6,000 onboarding requests in 2 months, reducing wait times from more than 1 hour to under 2 minutes.
- Developed a WordPress-integrated pricing calculator using PHP and Python, enabling students to make more informed enrollment decisions.
- Developed and presented a TypeScript/JavaScript dining dashboard providing real-time operating hours across all campus locations, integrating menu APIs to improve visibility of dietary accommodations and food labeling.
- Constructed internal accounting and sales dashboards with Tableau, Power BI, and Qualtrics, and connected the system to the GrubHub API

PERSONAL PROJECTS

Historical Illinois Election Machine Learning Project

2025

- Collected and merged geographic shapefiles for counties, parks and forest preserves, historical precincts and legislative/congressional districts to create engaging and interactive mapping graphics.
- Research, collect, and clean historical census, demographic, and economic data and merge with geographic data, identifying and resolving boundary changes.
- Complete Lasso regularization analysis to determine feature significance on predicting historical election results.
- Designed Geographically Weighted Regression(GWR) analysis built in Python to access the quality of features and heuristics
- Developed machine learning model that predicts election outcomes by geographic area based on dueling candidates boolean characteristics.

Native Sun & Terandina LLC - Chicago, IL

Launched E-Commerce Website - <https://terandina.com/>

Feb 2025

- Built and deployed a React/NextJS TypeScript website on Vercel, with a MongoDB database and UploadThing for images.
- Built custom content management system for store managers and a versatile REST API for products, sizes, prices, categories, and webhook integrations with Stripe.

EDUCATION

Washington University in St. Louis

B.S. Computer Science, second major in Political Science with a concentration in Quantitative Methods

- Completed Machine Learning for Python, Head Undergraduate Teaching Assistant in Quantitative Political Methodologies
- Significant "R" data science contributor to a published article, Elections and Representation in American Municipal Administration. [Link](#)
- Analysis of Algorithms, Multi-Paradigm Programming in C++, Computer Security, Object-Oriented Programming, Systems Software.
- Startup Co-Founder within the Skandalaris Entrepreneurship Center, participated in the Hatchery and Missouri Startup Weekend

TECHNICAL SKILLS

- **Programming Languages:** TS/JS, Python, PHP, C++, Java
- **Data Science Tools:** Scikit-learn, Pandas, Matplotlib, R
- **Geospatial Analysis:** ArcGIS, Geopandas, Shapely, MapLibre
- **Deployment:** CI/CD, Docker, AWS, GCP, Azure, Git, Vercel
- **Databases:** SQL, PSQL, Redis, MongoDB, Lambda, S3.
- **AWS Cloud:** EC2, IAM, S3, Lambda, exposure to SageMaker
- **Rapid App Development:** React, Angular, C#, NestJS, NextJS, Django Flash for Python
- **DevOps:** REST APIs, OAuth 2.0 integrations, price metering
